User shown other user's answer from Why Are You Here screen. User asked to memorize the other user's words, activity is time limited: countdown clock shown. New screen shown with other user's Why Are You Here answer but some words missing. (missing words determined by choosing top 3 longest words). User asked to fill in the blanks (infobird?). User must use same words (spelling errors allowed and no cap sensitivity). Percentage of correct words calculated. If less than 2/3 score, user informed through infobird that user must try again: repeat cycle. If all 3 correct, congrats screen with reward icon.

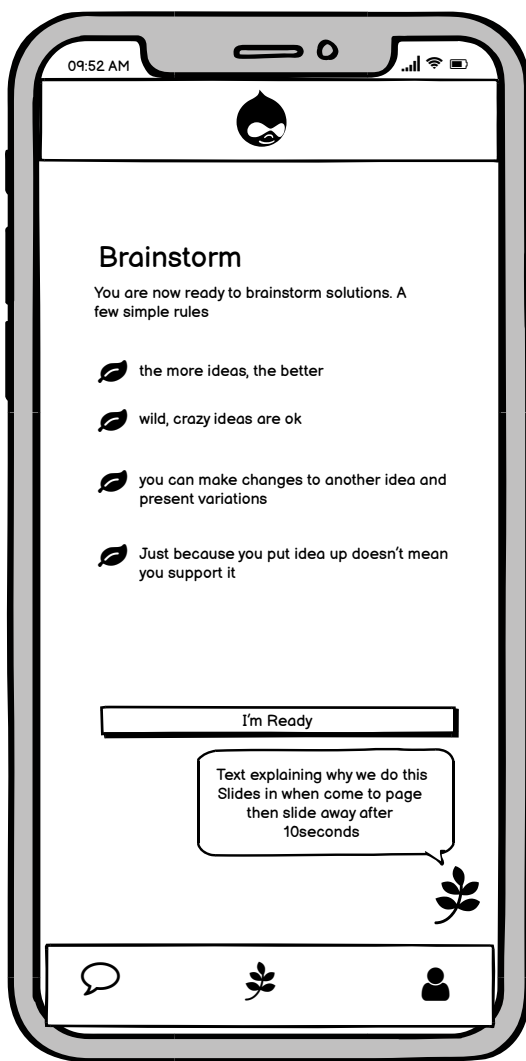

User has 10 second to memorize it.  
Show time count down

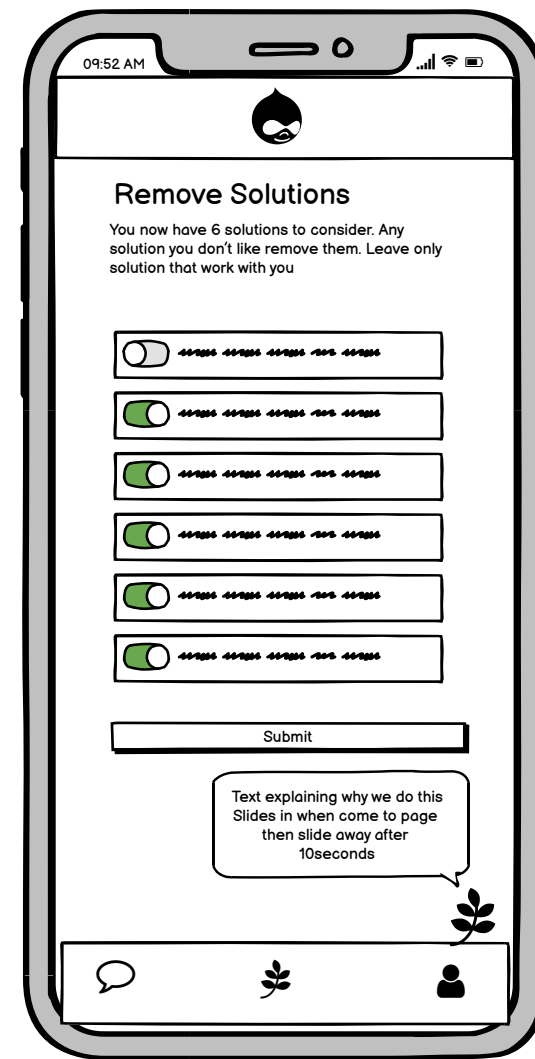

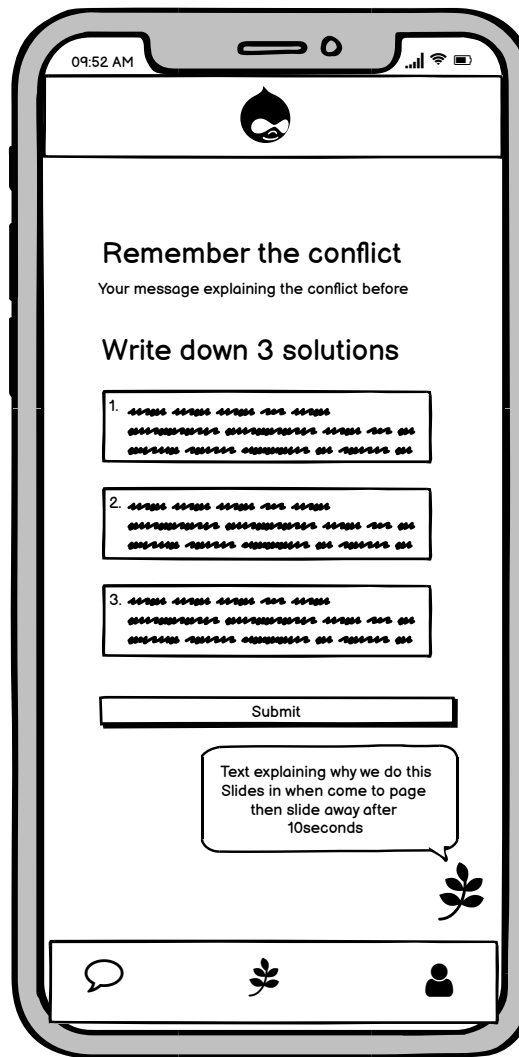

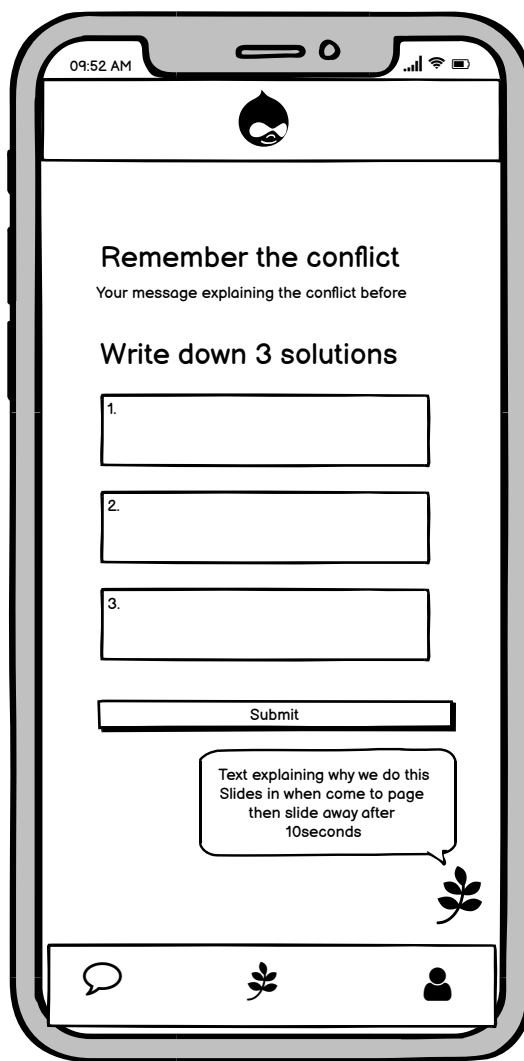

Tapping on underline open modal to enter word.  
Once entered, fill in line

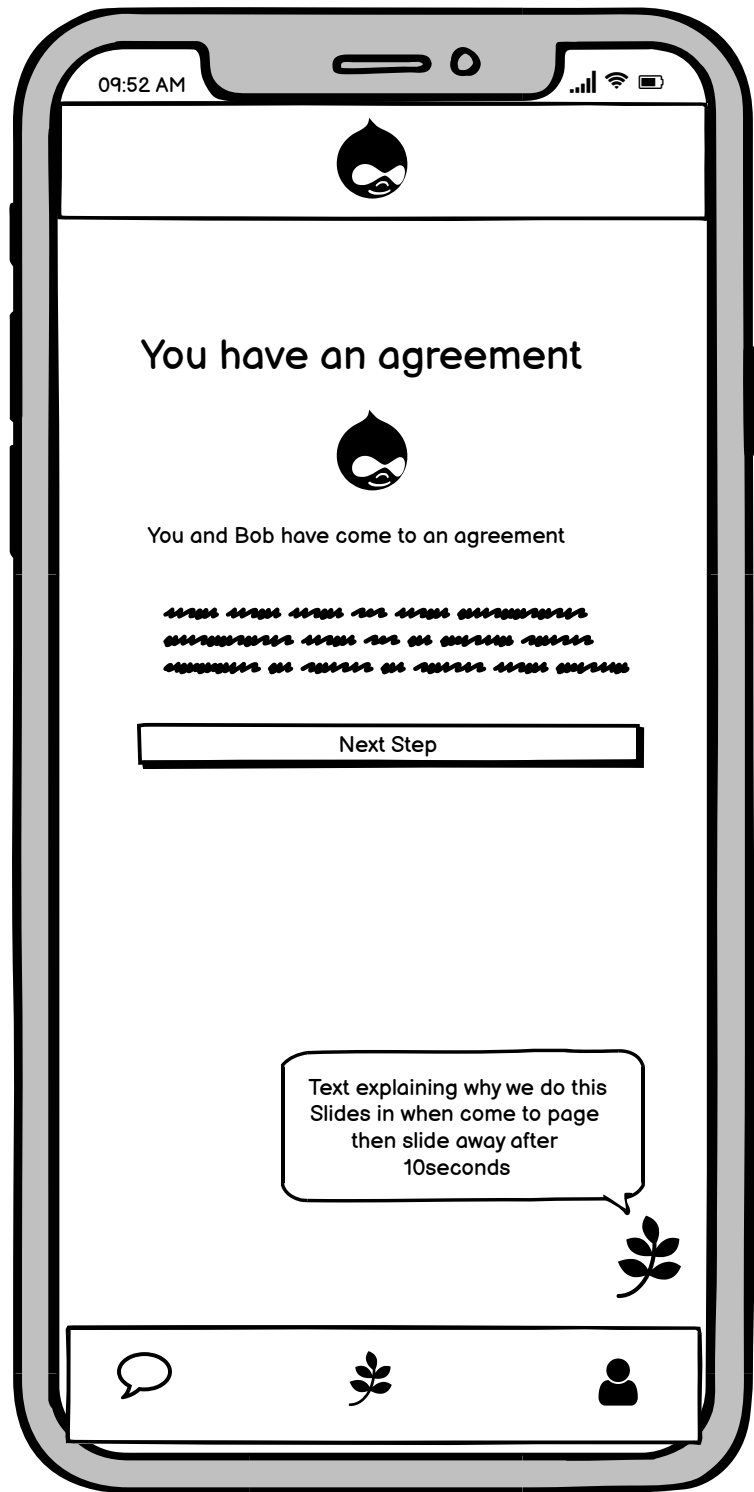

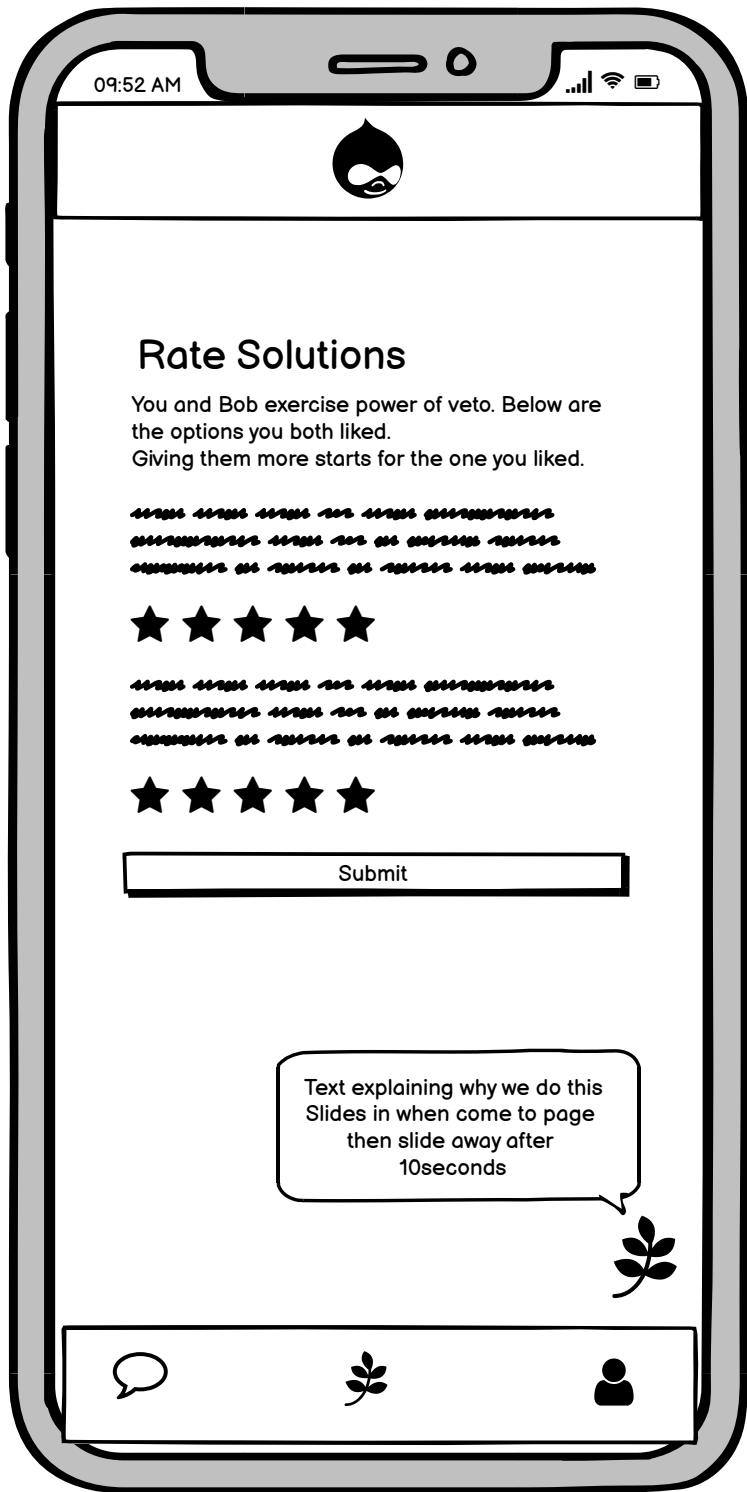

Draw checkmark and x above word

Users informed that they must now come up with possible solutions. Users shown conflict (answers to why are you here screen from both users put together) and asked to come up with 3 potential solutions (word limit).

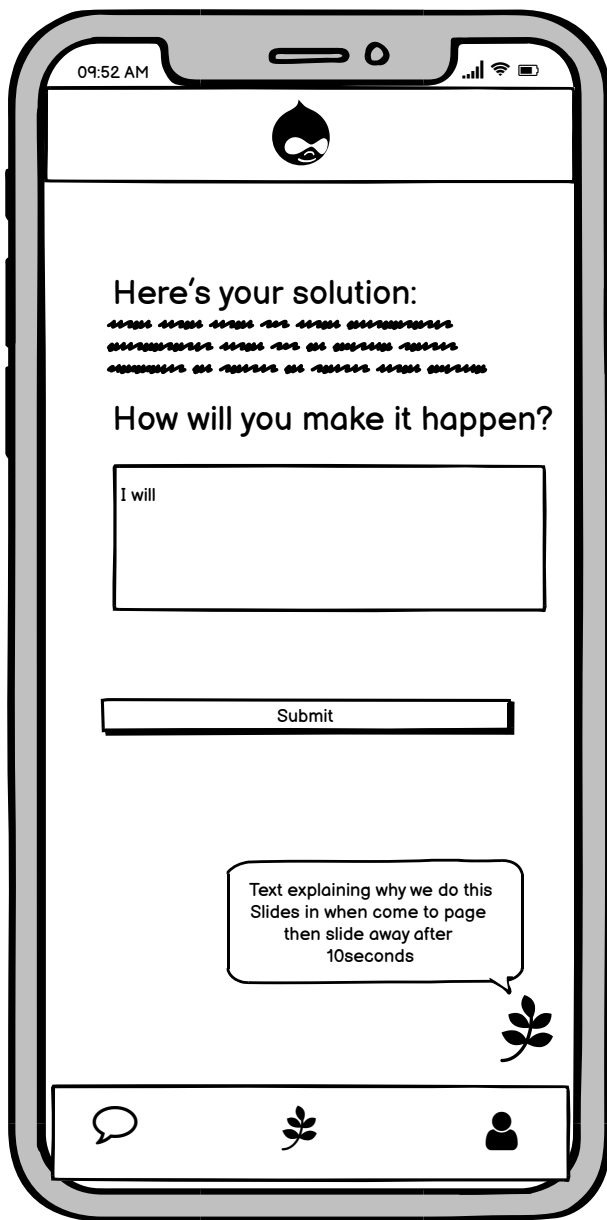

Answers from both users to brainstorm task put together in random order for a total of six solutions. Users asked to cross out the solutions they do not like.

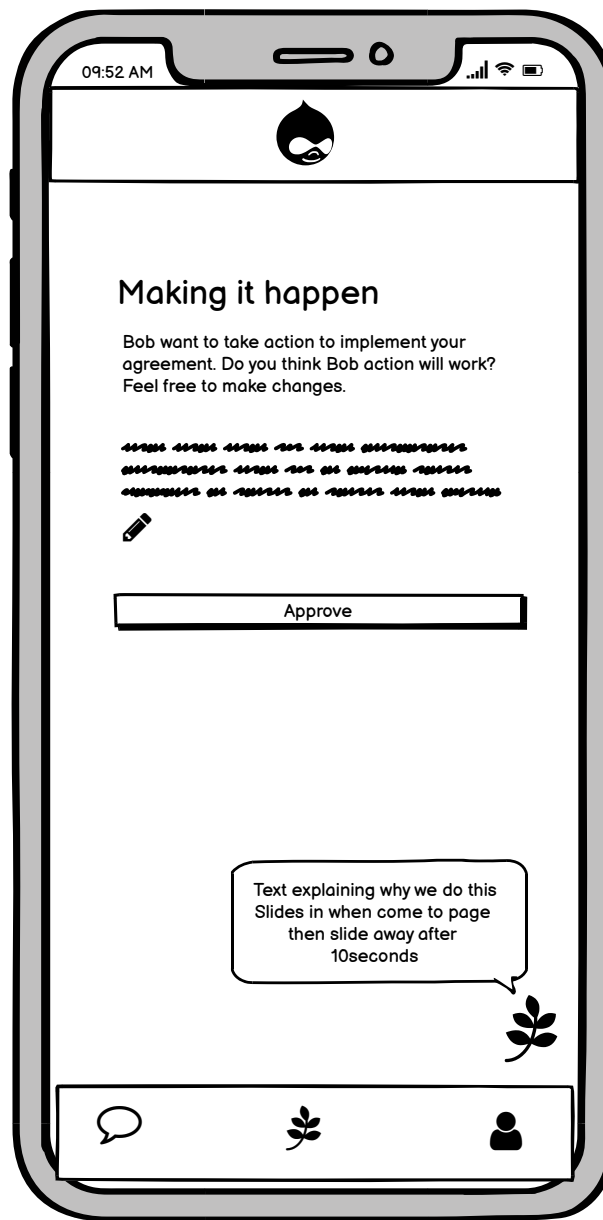

If users have more than one solution in common (left uncrossed), these solutions will be rated by each user. The solution with highest combined rating will be presented to both users as their agreed solution. Users asked if solution is good with them. If not, they will start brainstorm process again (informed through info bird). If yes, they will be informed they have an agreement.

Users shown solution and asked how they will contribute to implementing solution with response beginning with I will. Implementation suggestion shown to other user with ability to edit and approve (informed through infobird). Once edit made and approved by other user, contribution to be ok'd by user (yes-no through infobird). Agreement presented with date and emailed to each user. Users asked if they'd like their agreement emailed to manager (info-bird yes-no).

This part is confusing need to be thought out more by ux designer
